Summary

IT Professional, specialized in business intelligence, CRM, data warehouse, enterprise solution architecture, and digital transformation. Expertise in delivering BI and DW solutions, requirements analysis, design and project implementation in Agile and DevOps Methodologies. Good at analytics and aptitude, ability to adapt and work efficiently as a cross-functional lead and as an individual contributor.

Core Competencies

- Business Intelligence
- Enterprise Data Warehouse
- Data Visualization
- Statistical Analysis
- Data Modeling
- ETL/Data Pipeline
- Data Analysis
- CRM Application
- Automation Scripting
- Systems Integration
- DevOps
- Cloud Services
- Quality Assurance
- Project Management
- Process Improvements

Work experience

APR 2017 - PRESENT

Sr. BI & DW Engineer

Kaiser Permanente

Identifying the opportunities to improve services for Care Delivery business. Design, develop and implement business intelligence, data integration, and CRM solutions to improve operational efficiency and to reduce cost. Collaborate with business stakeholders in the pharmacy and IT operational team for project delivery.

- Data integration solution using enterprise ETL tool - Informatica and Oracle PL/SQL for the pharmacy data warehouse.
- Building operational and interactive reports for pharmacy, care delivery, and KP International.
- Automating dynamic report generation using PL/SQL, shell scripts and custom report delivery using Tableau rest API.
- Built python data pipelines to import data from the Cloudera landing zone to MySQL.
- Implemented python airflow and migrated cron jobs to the Airflow scheduler.
- Architect CRM forms on Oracle Apex, data mart and report design for the businesses to manage programs, contacts and institutions detail. The solution helps the organizers to identify the potential leads and confidence score, program scheduling and planning.
- Setup the intranet portal on Apache web-server and integrated Tableau report for real-time report refresh. created SharePoint site and KP Wiki pages for the data warehouse team to manage work intake and share/integrated reports.

Skills Stack: Tableau, OBIEE, Oracle Apex, Oracle, MySQL, Python, Informatica, RHE Linux, JIRA, Git SCM, PLSQL, Shell, SoapUI, Apache Webserver and Python Airflow

NOV 2016 - FEB 2017

Sr. BI & DW Architect - Consultant

Trane - La Crosse, WI

Developed project implementation road map with a proven solution to migrate legacy reports and database to standard Enterprise BI and data warehouse.

- Evaluated and documented the legacy report design, i.e., the object and data-level security and the report integration with internal applications.
- Identified critical and unique reports with respect to functionality and technical complexity for prototyping to new BI Platforms.
- Built a sandbox server to host OBIEE and Tableau servers on RHEL / Azure platform.
- Designed a similar interface as legacy application, with added functionality on the new BI platform. by creating a new interactive Home page. Demonstrate report drill-down, guided

navigation, selection steps, agents, security and burst reports.

- Collaborate with System admin/ IT Team and created project sprint plans for migrating to the new Data Lake, EDW solution and BI platforms.

Skills Stack: Tableau, OBIEE, BI Publisher, BIRT Actuate, PL/SQL, Cloudera, Oracle, AWS and SoapUI

SEP 2005 - PRESENT

Sr. Architect - BI Technology

Cognizant Technology Solutions, US

Implemented multiple business intelligence and data warehouse development, enhancement and upgrade projects for various customers like BELK, TIAA, Cbeyond, Wells Fargo, and Franklin Templeton. Lead and mentor onshore and offshore teams.

- Collaborated with business teams to create user stories, functional documents, and technical documents.
- Architect data models for enterprise OLAP Data Warehouse.
- Developed operational reports on Oracle RMS and Oracle ERP Financials.
- BI Application integration with SharePoint, CRM Apps, and Web portals. Leveraged Application API (WSDL) and SoapUI scripts for the interfaces.
- Work on designing ETL data pipelines and enhance Enterprise data warehouse.
- Customized OBI Financial (GL, FA, AP, and PA) and HR Analytics applications to cater to business needs.
- OBIA Type 1, Type 2 and Type 3 customization in Informatica and OBIEE out of the box solution for Finance and HR modules.
- Data modeling, defined facts and dimensions, designed dimensional hierarchy, level-based measures, and aggregate views.
- Administered BI Services, horizontally scaled out bi server components. OBIEE and BI Publisher server upgrade. Install binaries for Oracle bi and patching. BI application integration with SharePoint site and enabled site root certificate and SSO configuration using Kerberos / SAML 2.0 based network authentication.
- Research and tune application performance issues and defects. Remediate product bugs working with product Vendors like Oracle and Tableau support.

Skills Stack: Tableau, OBIEE / Siebel Analytics, OBIA, BI Publisher, Informatica, OC4J, Weblogic, Siebel CRM Finance, Oracle Finance, HR Analytics, Oracle, Teradata, PL/SQL, Oracle RMS, CS SCM, SAML 2.0, Kerberos, WSDL, SoaPUI and Shell Scripting

Technological Proficiency

- **Business Intelligence:** Tableau, OBIEE, BI Publisher, OBIA and DMO
- **Data Integration:** Informatica, PL/SQL, SQL loader, Python
- **Programming:** SQL, PL/SQL, Python, Shell, R, JavaScript, and HTML
- **IDE:** Visual Studio Code, PyCharm, Jupyter Notebook, R Studio, SQL Developer, TOAD, and Notepad ++
- **Data Modeler:** ERwin Data Modeler, ER Studio and Microsoft Visio for Logical Modeling
- **Database :** Oracle, Teradata, SQL Server, MySQL, Cloudera Hive/Impala, Amazon Redshift, MongoDB (NoSQL) and XML
- **DevOps Tools:** JIRA, Confluence, CA SCM, Git, MS SharePoint, Visual Source Safe, HPQC
- **Platform:** Windows Server 2012 R, Red Hat Enterprise Linux, IBM AIX, UNIX, Azure, and AWS Cloud Servers

Professional Certifications

- Oracle Certification - Siebel Analytics 7.7 (OBIEE) Certified Server Architect
- Oracle Certification - Siebel Analytics 7.7 (OBIEE) Certified Application Developer
